github.com/israou

Full-Stack Developer with strong foundations in system programming and modern web technologies. Experienced in building modern web applications using React, Node.js, PostgreSQL, and Docker. Passionate about backend architecture, APIs, and distributed systems, with strong problem-solving skills developed through the 42 Network curriculum.

KEY TECHNOLOGIES

Node.js • React • PostgreSQL • MongoDB • Docker • REST APIs • Linux • NGINX

EDUCATION

- Software Engineering Program**
1337 School (42 Network) | UM6P
Jan 2023 – Present
- Baccalaureate in Physics & Chemistry**
La Palmeraie Schools
2022

TECHNICAL SKILLS

Languages

JavaScript, TypeScript, C, C++, Python, SQL

Frontend

React.js, Next.js, Tailwind CSS, HTML5, CSS3, Responsive Design

Backend

Node.js, Express.js, REST APIs, JWT Authentication, WebSockets

Databases

PostgreSQL, MongoDB, MySQL, Database Design

DevOps / Infrastructure

Docker, Docker Compose, NGINX, Linux, CI/CD, GitHub Actions, Bash

LANGUAGES

Arabic	Native
French	Native
English	Professional working proficiency

VOLUNTEER EXPERIENCE

Volunteer

Association Bab Rayan

Jun 2017 – May 2018 · Casablanca, Morocco

Tasks / Achievements

- Participated in **Ramadan solidarity initiatives**, helping organize and distribute meals and aid for children in vulnerable situations.

Volunteer

Nos Amis pour la Vie

2019 – 2021 · Marrakech, Morocco

Tasks / Achievements

- Assisted in animal rescue and daily care activities within the sanctuary.
- Supported feeding, cleaning, and basic care for rescued animals.
- Contributed to **TNVR** and adoption initiatives.

ORGANIZATIONS

Co-Founder & Software Engineer — RobTech

2026

Co-founded a digital innovation company delivering custom software solutions for businesses. Designed and developed SaaS platforms, workflow automation systems, modern web applications, premium e-commerce websites, NFC-based digital solutions, and SEO strategies to help clients accelerate their digital transformation.

PERSONAL PROJECTS

E-Commerce Platform (AchrafRadif)

Developed a modern e-commerce platform for smartphone sales featuring a responsive storefront and admin dashboard using Next.js, TypeScript, PostgreSQL, and Tailwind CSS. Implemented product management, authentication, order workflows, and dynamic product configurations. Integrated Supabase for backend services and PostgreSQL database management, Cloudinary for media storage, and deployed the application using DigitalOcean infrastructure.

ATELIER SEIZE PARIS (Premium Fashion E-Commerce)

Designed and developed a premium fashion e-commerce platform inspired by the digital experience of luxury brands. Built the frontend with React, TypeScript, and Tailwind CSS, with a FastAPI backend.

Full-Stack Web Application (ft_transcendence)

Designed and implemented a user profile management system with full CRUD functionality using Node.js, Express, and MongoDB. Developed RESTful APIs handling profile updates, settings management, and friend relationships between users. Implemented a scalable friend system supporting friend requests and relationship management across multiple users.

Unix Shell Implementation (Minishell)

Built a Unix shell replica in C with command execution, built-ins (cd, echo, export, env, exit), and signal handling. Implemented I/O redirection and heredoc operators. Managed process creation and inter-process communication for pipeline execution.

Dining Philosophers Problem (Philosophers)

Implemented the classic dining philosophers problem using multithreading and mutex locks. Designed deadlock prevention mechanisms and synchronized resource sharing between threads.

Containerized Infrastructure (Inception)

Designed and deployed multi-service architecture using Docker and Docker Compose. Configured NGINX reverse proxy, database services, and application containers with optimized networking.

Real-Time Chat Server (ft_irc) • C++, TCP/IP, Socket

Built scalable server handling concurrent connections with multi-client channel management over TCP sockets.

CERTIFICATES

GoMyCode

Apr 2023 – Jul 2023 · Introduction to Web Development (HTML, CSS, JS, DOM)

Oracle Cloud Infrastructure Foundations Associate — Oracle

Fundamentals of cloud computing, Oracle Cloud services, networking, security, and scalable infrastructure design.

Responsive Web Design Certification — FreeCodeCamp

Building responsive websites using HTML, CSS, Flexbox, Grid, and accessibility best practices.
